Solartek of Puerto Rico has been working in the renewable energy and with energy efficient technologies since 1992. We perform planning, consulting, engineering design, sales, and installation for energy efficiency and renewable energy projects of any size, any where. We have alliances with the best suppliers, finance resources and related field professionals.. Solartek is currently developing and commercializing proprietary products of our own as well providing consulting services to other businesses. **Solartek** has been actively engaged in U.S. and international initiatives. Among our clients are universities, state and federal government agencies, utilities, real estate developers, industries, architectural and engineering firms, as well as individual home and business owners.

Our Business Objective

Promote sustainable development through the use of energy efficient equipment and practices along with renewable energy technology.
